

HARDWARE OPTION ANGLED COUPLER

DRIVE MULTIPLE ANGLED WINDOW SHADES WITH A SINGLE MOTOR

Pluralsight Corporate Headquarters, Draper, Utah. Dealer: Right Touch Installations. Photographer: Tory Taglio.

- **Draper® FlexShade® Angled Coupler** makes it easier to drive multiple angled window shades with a single motor. Reduce your budget costs with reduced motor counts.

FEATURES

- Brackets are installer-friendly and can overcome walls that are not perfectly flat.
- Brackets accept both standard- or reverse-roll fascia, and can also be used with a surface mount headbox.
- Compatible with 2" (51 mm) and 3" (76 mm) diameter rollers. Adjacent roller tubes must be the same diameter.
- Accommodates inside and outside corner angles to 90 degrees.
- Coupled shades must be the same height. Each panel's height can be independently adjusted.
- Easier to order and requires fewer job site visits.

NOTE

Some products may not be coupled.
Please contact Draper for hardware restrictions.
