

ZbDMI — ZigBee™ to Digital Motor Interface

Item #: 1870220

OVERVIEW:

The **Somfy ZigBee™ Digital Motor Interface (ZbDMI)** is a ZigBee routing device that resides as an endpoint within a designated ZigBee control network. It receives ZigBee transmissions and converts them to motor control commands for Somfy's line of RS485 (AC) motors, and the Sonesse 30 RS485 (DC) motor. The interface also receives feedback information from these motors and distributes it to the ZigBee network.
